

Service unit combinations MSB-FRC, MS series

FESTO

Festo Core Range
Solves the majority of your automation tasks

Worldwide:
Simply good:
Fast:

Quickest delivery – wherever, whenever
Expected high Festo quality
Easy and fast to select

With the Festo Core Range, we have selected the most important products and functions from our broad product catalogue, and added the quickest delivery.

The Core Range offers you the best value for your automation tasks.

Just look
for the
star!

Key features

Service unit components of the MS series

Solutions for every application

With its large product range, highly effective components and a wide choice of functions, the MS series from Festo offers a complete concept for compressed air preparation. It is suitable for simple standard applications as well as application-specific solutions with very high quality requirements. Available as individual components, pre-assembled combinations ex-stock,

application-specific combinations or complete turnkey solutions. The five sizes in the MS series achieve maximum flow rates with minimum space requirements.

Freely combinable function modules

Pressure regulators, on/off and soft-start valves with safety function, filters, pressure and flow sensors, dryers, sensors and lubricators can be assembled into a suitable solution for every task. With the modular structure the components can be combined as required. The simple connection system saves time because replacing individ-

ual modules does not require disassembling the entire combination. Many of the components are also UL and ATEX certified.

CAD models and configurator

Convenient tools for planning and selecting application-specific individual components and combinations. The product configurator lets you configure customised solutions quickly and transfer the order data without any hassle.

Engineering tools

Selection tool for choosing the right service unit combination without oversizing, and with the right air purity class:

→ www.festo.com/engineering/service-unit

Air quality

This program supports configuring an appropriate service unit. Please insert the required air cleanliness either by your application or an ISO-code or by direct selection of air filters.

Selection criteria: Application

Filter combination is proposed based upon your selected application

- standard pneumatics operation of valves and cylinders, e.g. in automotive industry, secondary packaging
- mining and building industry applications without special air cleanliness requirements
- application of pressure operated tools and machines pneumatic hammer, air engine, positioning with proportional valve
- electronic, flatpanel and solar industry, textile and paper production application with residual oil content <math>< 0.5 \text{ mg/m}^3</math>
- painting, powder coating, air bearing application with residual oil content <math>< 0.01 \text{ mg/m}^3</math>
- food and beverage industry, optics application with residual oil content <math>< 0.003 \text{ mg/m}^3</math> reduction of oil vapours and aromas

Selection criteria: ISO-class

Filter combination is proposed based upon the air cleanliness class according to ISO 8573-1:2010

particle : 4 * : oil

* Downstream from the compressor the water content is assumed to be ISO class 4. Better classes can be achieved by applying an absorption dryer (PAD) or a membrane dryer (LDM)

Direct filter selection

Independent selection of filter combination

- 40 µm Filter
- 5 µm Filter
- 1 µm Fine Filter
- 0.01 µm Micro Filter *
- Active Carbon Filter

* To enhance the filter lifetime and in consequence the maintenance interval arrange a 1 µm Fine Filter in front of the 0.01 µm Micro Filter as a preliminary filter!

Integrated sensors

Pressure and flow sensors

- Maximum machine availability thanks to controlled processes
- Reliable compressed air preparation and supply for the system
- Integrated or stand-alone
- Easy to connect with M8/M12 plug

Safety functions

Soft-start/quick exhaust valves

MS6-SV/MS9-SV

- Fast and reliable exhausting of systems up to Performance Level e, certified to EN ISO 13849-1
- Integrated soft-start function

Energy savings

Service unit combinations MSE6

- Fully automatic monitoring and regulation of compressed air supply
- Automatic shut-off of the compressed air in stand-by mode
- Detection and notification of leakages
- Condition monitoring of relevant process data

Intelligent mix of sizes

- Optimum flow rate with a size that is up to 18% smaller
- Excellent energy efficiency
- Cost-optimised combinations – save up to 30%!

Size differences

Size	MS2	MS4	MS6	MS9	MS12
Grid dimension [mm]	25	40	62	90	124
Connection sizes	M5, QS-6	G1/8, G1/4, G3/8	G1/4, G3/8, G1/2, G3/4	G1/2, G3/4, G1, G1 1/4, G1 1/2	G1, G1 1/4, G1 1/2, G2
Standard nominal flow rate q_{N1} [l/min]	350	1800	6500	20000	22000

1) Using pressure regulator MS-LR as an example

Key features

Note

Information

The next few pages provide a brief overview of the product range for the service unit components of the MS series.

You can find detailed information and all the technical data in the documentation for the relevant service unit component.

Accessories such as connecting plates or mounting brackets can be ordered either via the configurator or separately.

Design of a service unit

The order of the individual service unit components within a combination is relevant for safety and functionality. The service unit components cannot be combined in any order in the flow direction. They are subject to restrictions and rules.

The configurator for the service unit MSB is a reliable and convenient way of combining individual service unit components and it ensures compliance with the applicable rules. As a result, you get a fully assembled unit, including UL or ATEX certification, if necessary.

When combining a unit from individually configured and ordered service unit components, the points on the right must be adhered to under all circumstances.

- Regulators MS-LFR/LR/LRP/LRE are only permissible in the flow direction with the same or decreasing pressure regulation range
- Filters MS-LFR/LF/LFM/LFX are only permissible in the flow direction with an increasing grade of filtration
- Lubricators MS-LOE are not permitted in the flow direction upstream of a filter MS-LFR/LFM/LF/LFX, water separator MS-LWS or membrane air dryer MS-LDM1

- A micro filter MS-LFM must be installed in the flow direction upstream of an activated carbon filter MS-LFX or membrane air dryer MS-LDM1
- A flow sensor SFAM cannot be installed directly downstream of a regulator MS-LFR/LR; a branching module MS-FRM must be positioned between them
- A soft-start/quick exhaust valve MS-SV must be the last service unit component in the flow direction

Datasheet

With manual rotary condensate drain

Fully automatic

-  Flow rate
850 ... 4800 l/min
-  Temperature range
-10 ... +60°C
-  Operating pressure
1.5 ... 20 bar
-  www.festo.com

- Filter, regulator and lubricator functions in a single unit
- High flow rate and highly efficient in removing contaminants
- Good regulation characteristics with minimal pressure hysteresis
- Set values are secured by locking the rotary knob
- Lockable rotary knob
- Two pressure regulation ranges: 0.3... 7 bar and 0.5 ... 12 bar
- Available with manual or integrated, fully automatic condensate drain
- Choice of filter inserts 5 µm or 40 µm
- New filter cartridges

General technical data		MSB4	MSB6
Size			
Pneumatic connection 1, 2		G1/8 G1/4 - -	- G1/4 G3/8 G1/2
Design		Filter regulator with pressure gauge Proportional standard mist lubricator	
Regulator function		Output pressure constant, with primary pressure compensation, with return flow, with secondary exhausting	
Type of mounting		With accessories	
Mounting position		Vertical ±5°	
Grade of filtration [µm]		5 40	
Air purity class at the output		Compressed air to ISO 8573-1:2010 [6:4:-] (grade of filtration 5 µm) Compressed air to ISO 8573-1:2010 [7:4:-] (grade of filtration 40 µm)	
Bowl guard		Plastic bowl guard -	Plastic bowl guard Integrated as metal bowl
Condensate drain		Manual Fully automatic	
Actuator lock		Rotary knob with detent, can be locked using accessories	
Pressure regulation range [bar]		0.3 ... 7 0.5 ... 12	
Display pressure		With pressure gauge	

† Note: This product conforms to ISO 1179-1 and ISO 228-1.

Datasheet

Standard nominal flow rate $q_{nN}^{1)}$ [l/min]					
Size	MSB4			MSB6	
Pneumatic connection	G1/8	G1/4	G1/4	G3/8	G1/2
Pressure regulation range 0.3 ... 7 bar					
Grade of filtration	40 μ m	–	1400	–	4800
Pressure regulation range 0.5 ... 12 bar					
Grade of filtration	5 μ m	–	850	–	3600
	40 μ m	850	900	1900	3500

1) Measured at $p_1 = 10$ bar and $p_2 = 6$ bar, $\Delta p = 1$ bar.

† 125 l/min must be available for the fully automatic condensate drain to close correctly.

Operating and environmental conditions					
Condensate drain	Manual			Fully automatic	
Size	MSB4		MSB6		MSB6
Operating pressure [bar]	1.5 ... 14		1.5 ... 20		2 ... 12
Operating medium	Compressed air to ISO 8573-1:2010 [–:4:–]			Compressed air to ISO 8573-1:2010 [7:4:–]	
	Inert gases				
Note on the operating/ pilot medium	Lubricated operation possible (in which case lubricated operation will always be required)				
Ambient temperature [°C]	–10 ... +60				
Temperature of medium [°C]	–10 ... +60				
Storage temperature [°C]	–10 ... +60				
Corrosion resistance class CRC ¹⁾	2				
Food-safe ²⁾	See supplementary material information				

1) Corrosion resistance class CRC 2 to Festo standard FN 940070

Moderate corrosion stress. Indoor applications in which condensation can occur. External visible parts with primarily decorative surface requirements which are in direct contact with a normal industrial environment.

2) Additional information: www.festo.com/catalogue/ms → Support/Downloads.

Weight [g]		
Size	MSB4	
With plastic bowl guard	500	
With metal bowl	–	
Size	MSB6	
With plastic bowl guard	1495	
With metal bowl	1713

Datasheet

Standard flow rate q_n as a function of output pressure p_2

Pressure regulation range 0.3 ... 7 bar Grade of filtration 5 μm
MSB4-1/4

Grade of filtration 40 μm

Input pressure $p_1 = 10$ bar

Pressure regulation range 0.5 ... 12 bar Grade of filtration 5 μm
MSB4-1/8

Grade of filtration 40 μm

Input pressure $p_1 = 10$ bar

MSB4-1/4

Input pressure $p_1 = 10$ bar

Datasheet

Standard flow rate q_n as a function of output pressure p_2

Pressure regulation range 0.3 ... 7 bar Grade of filtration 5 μm
MSB6-1/2

Grade of filtration 40 μm

Input pressure $p_1 = 10$ bar

Pressure regulation range 0.5 ... 12 bar Grade of filtration 5 μm
MSB6-1/4

Grade of filtration 40 μm

Input pressure $p_1 = 10$ bar

MSB6-3/8

Input pressure $p_1 = 10$ bar

MSB6-1/2

Input pressure $p_1 = 10$ bar
